

ALWAYSE FLOAT-ON

NEW RANGE OF SPECIALIST CASTORS FOR HANDLING GLASS & OTHER SHEET MATERIALS

Available with rubber, polyurethane, polyethylene or nylon balls.

We supply in any combination of components to suit your application. Complete Tables manufactured. We can advise and quote for complete areas to your specification. Consult Alwayse for a total scheme.

- **TYPES.** Illustrated above are Black-Rubber, White-Polyethylene and Red -Polyurethane ball castors.
- **APPLICATIONS.** Polyurethane balls are recommended for heavier loads and poorer working conditions. Polyethylene balls are often used at inspection areas and are suitable for hygienic conditions. The black rubber balls are for most other applications.
- **STAINLESS STEEL.** Ball stems, tables and fittings can be manufactured in stainless steel for the food, Drink and Pharmaceutical industries.
- **SURFACE PROTECTION.** Large diameter balls mean these castors are ideally suited for handling materials that have delicate or polished surfaces.
- **WORKING ENVIRONMENT.** Due to the position of the inverted wheel bearing and the cover over the socket bearing, these castors are ideal for use in dust laden atmospheres.
- **FIXING.** Simply mount in a suitable base plate drilled to 14mm clearance and adjust castor for height.
- **AVAILABILITY.** Ex-stock for same day despatch.
- **MANUFACTURED.** In U.K by **ALWAYSE.**

Reference. No.			A Ø mm	*B mm		C mm	D mm	Load Cap Kgs.	E Ø mm
Rubber	Polyurethane	Polyethylene		Min.	Max.
