

mini conveyors for small parts

Cost effective Conveyor Systems

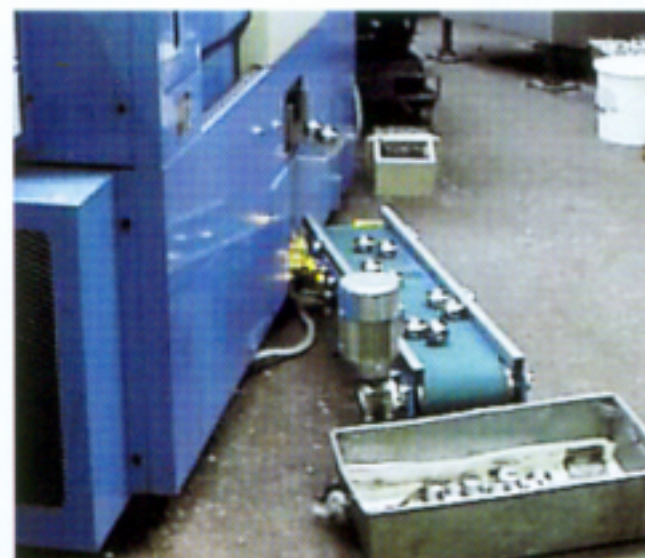

The Mini belt Conveyor was designed to offer the most cost-effective solution to a whole range of industrial processes. Manufactured from 2.5mm mild steel rolled section for strength and versatility, compared with light weight aluminium models.

The basic construction is totally flexible, you can bolt on guide rails, add centre dividers, move stand positions, strip down drive units for speedy belt replacements all within minutes, leading to less maintenance time.

Depth of skid bed section is 43mm.
Conveyor length 500mm to 5000mm.

Belt widths 45mm to 450mm,
smooth, griptop, PVC or PU we can even provide a steel mesh belt where heat or coolants are involved.

Finish normally Green to RAL 6011 but any colour could be specified for instant recognition.

9 Orton Way, Haywood Industrial Park, Castle Bromwich, Birmingham B35 7BT. England.
